

PALLET RACKING

Our Pallet Racking Frames available from Standard to Heavy with nominal bay load capacities from 8,000kg to 12,000kg. To get a quick quote today call us on **01908 511048**. Five Standard Stock Heights from 3000mm to 10,000mm and two standard widths 900mm and 1100mm. The Frames are of bolted construction, and can be delivered to site in either KD form or Pre-Assembled. Storage beams are fully adjustable on a 3" (76.2mm) increment and can be adjusted at any time without the need for either tools or skilled labour. Storage beams are fitted with automatic safety locks, avoiding accidentally dislodging a beam during normal operations with a fork lift truck. Wide range of sizes available for any application. All our Pallet racking is held in stock.
